

Now Hiring: Robot Field Technician

Full-time position as Robot Field Technician (m/f)

You are a hardware-software generalist who loves robots and likes to make things work in real life? You are an enthusiast about robotics? You like operating high-end robot hardware in challenging applications? Want to develop robots that will revolutionize the logistics market in the near future? Want to be part of a team developing a mobile pick-and-place robot for warehouses in e-commerce applications? Want to join us now?!

What you can expect

- You will work on the installation, deployment, maintenance, testing, evaluation and troubleshooting of our robots at customer sites. You will set up the robots in their operation environment and perform troubleshooting in close collaboration with the developers in Magazino's head office.
- In addition, you will perform field service at customer sites including light mechanical and electrical assembly tasks, and train customers in using the robot.
- Further responsibilities include determining system requirements and making recommendations by analyzing the robot's performance and the customer needs.
- This position involves frequent travel to customer sites (about 80% of the time) in Germany currently

What skills and expertise you need

- BS degree in Robotics, Mechatronics, Computer Science, or equivalent experience
- 1+ years of software development experience, 3+ years working with hardware
- Expertise and understanding of mechanics, system electronics, IT and networking as required for troubleshooting in robotic systems
- Experience using multimeters and general hand tools, ideally Soldering experience
- Basic knowledge of C++ and/or Python on Linux platforms
- Experience with the Robot Operating System (ROS)
- Linux system usage including command line interfaces, basic system administration
- Excellent customer relations and organizational skills, attention to detail, good troubleshooting skills
- Valid driver's license and fluent English and German required

What we have to offer

- A position with an attractive salary in a well-funded startup company that will change the robotics world
- A motivating work atmosphere as part of a quickly growing team of high-profile roboticists with flat hierarchies
- High responsibility for projects, vast possibilities for bringing in your creative ideas and valuable input, and lots and lots to do
- 100% startup feeling: "free fridge" with Club Mate, coffee and fruits, frequent team events, joint meals, a spacious loft-design office, our own workshop with 3D printers etc.

Who we are

Magazino is a fast growing independent startup, located in Munich (Germany), founded in 2014. We develop and construct perception based controlled and mobile robots for the intralogistics. Very rapidly Magazino grew to over 35 full-time employees, expanding constantly. Since May 2015, Siemens Innovative Ventures is a non-controlling minority stake holder.

The pick and place robot TORU, which is able to handle specific, individual items, is Magazino's latest product launch.

If you love robotics and would like to join us, we'd be more than happy to receive your CV, report card and cover letter at bewerbung@magazino.eu or call us at +49-89-21552415-0!
